Congratulations on your purchase of this smartphone device. **Quick Start Guide** will help you go through the basic features of your device.

What's in the Box?

Your package comes with the following items. If any of them is missing, please contact your retailer.

 A simple line drawing of a smartphone device with a screen and four physical buttons on the right side.	 A coiled Mini USB cable with a standard USB connector on one end and a smaller Mini USB connector on the other.	 A small, rectangular pouch with a drawstring closure.
 A compact AC adapter with a power cord attached.	 A flat, rectangular booklet or guide.	 A pair of over-ear headphones with a microphone.

Your Device

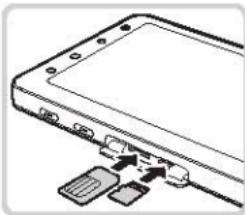

Installing SIM Card and Memory Card

To install SIM card and microSD card

1. Open the card cover.
2. Insert SIM/microSD card with the gold contacts facing up as shown on the illustration.
3. Close the card cover.

 **NOTE:**

- To remove the memory card, push it down to eject it from the slot.
- Do not remove the memory card while the device is turned on. Sudden removal of the memory card may cause data loss or unpredictable system hang up.

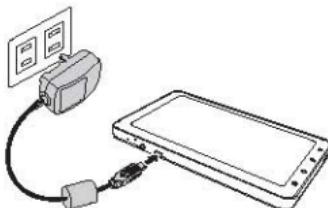

Charging Battery

1. Connect one end of the AC adapter to mini USB connector of the device.
2. Plug the other end of the AC adapter to the wall outlet to start charging.

 **NOTE:**

- Charging time with in-box 5V/2A AC adapter, less than 3 hours (power-off mode). Battery life may vary depending on user usage.
- Battery can also be charged when device connects to computer through USB cable.

First Start Up

After installing SIM card and charging battery, device is ready to turn on.

Home Screen

From Home screen, you can quickly access common features, view notifications of missed calls, received messages and check connection status.

Tap **Application Drawer** to access applications and settings of the device.

Making Your First Call

On Home screen, tap  > Phone.

To make a voice call

1. Tap phone number on keypad.
2. Tap  to erase a wrong number. Tap and hold  to erase entire number.
 **NOTE:** To call a contact, tap the contact from the list.
3. After entering phone number, tap .
4. To end the call, tap .

To answer a call

To answer a call, tap .

Entering Information

Regardless of the application, you can enter information using on-screen keyboard.

To use on-screen keyboard

When an application requires text input, tap the input box to display on-screen keyboard.

1. Tap the input box to display on-screen keyboard.

NOTE: To toggle between capital and small letter display, tap . To display numeric and symbols keyboard, tap . Tap to toggle back.

2. Tap keys on the keyboard to enter characters.

NOTE: If word completion is activated, the screen displays a list of suggested words as typing the characters.

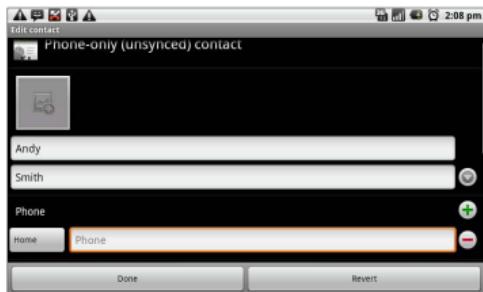

Contacts

To add a Contact

1. On Home screen, tap **Contacts**.
2. Tap **Menu > New contact**.
3. Enter contact information such as name, phone number, email address etc. Tap **Done** to save the contact or tap **Revert** to exit without saving any change.

 **NOTE:** SIM Contact only stores name and phone number. To store more information such as an email address, create a new contact on the device.

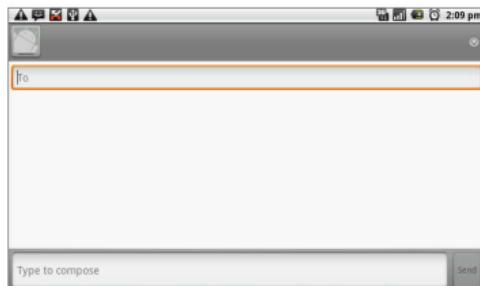

To import contacts

1. On Home screen, tap **Contacts**.
2. Tap **Menu > Import/Export**.
3. Select to import contacts from **SIM Card** or **SD Card**.
4. Select contacts to import or tap **Menu** to select **Import all**.

Sending a Text Message

1. On Home screen, tap **Messaging**.
2. Tap **New message**.
3. In **To** field, enter the recipient's phone number, then tap **Next**.
4. Type message in the **Type to compose** field, then tap **Done**.
5. Tap **Send**.

Sending a Multimedia Message

A multimedia message (MMS) can contain graphic and audio files.

1. On Home screen, tap **Messaging**.
2. Tap **New message > Menu > Add subject**.
The message automatically converts to an MMS message.
3. Enter mobile phone number or email address of the recipient in the **To** field then type the **Subject**.
4. To add components, tap **Menu > Attach** to attach pictures or videos.
5. Tap **Send**.

Sending a Voice MMS

1. On Home screen, tap **Messaging**.
 2. Tap **New Message > Menu > Attach > Record audio**.
 3. Tap  to start recording.
 4. Tap  to stop recording.
-  **NOTE:** Tap  to play the voice. Tap **Use this recording** to store the voice. Tap **Discard** to delete the voice. After storing the voice, you can also tap to **Play**, **Replace** and **Remove** the voice.
5. Enter the mobile phone number in the **To** field. The voice message can be sent up to 20 recipients.
 6. Tap to enter message in the box and tap **Send**.

Setting up Wi-Fi

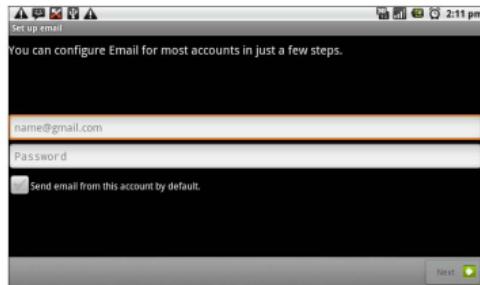

Connect to a wireless network to browse Internet.

1. On Home screen, tap  > **Settings**.
2. Tap **Wireless & networks**.
3. Tap **Wi-Fi** to activate.
4. Tap **Wi-Fi settings** > **Network notification** to start detecting networks. The available networks will then be listed.
5. Tap **Add Wi-Fi network** to add a connection.

 **NOTE:** Connecting to a secured network will prompt for password. Enter password then tap **Connect**.

Setting up Email Account

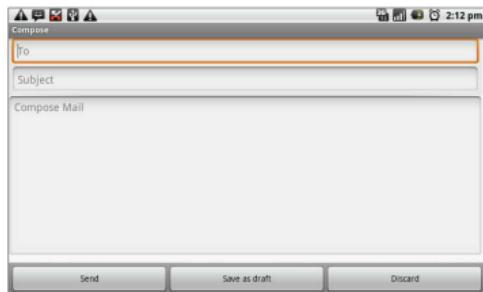

1. On Home screen, tap  > **Email**.
2. Select your email account provider.
3. Enter your **Email address** and **Password**.
4. Tap **Next**. The device will automatically retrieve email settings.
5. Enter **Name** and **Account display name**.
6. Tap **Done**.

Sending and Receiving Emails

Composing and sending emails

1. On Home screen, tap  > **Email**, then tap an email account.
2. Tap **Menu** > **Compose**.
3. In **To** field, enter recipient's email address.
4. Enter **Subject**.
5. Compose contents.
6. Tap **Send**.

Adding attachments to an email message

1. Tap **Menu** > **Add attachment**.
2. Select items to attach.

Receiving emails

Emails are automatically received in **Inbox** folder when phone connects to network.

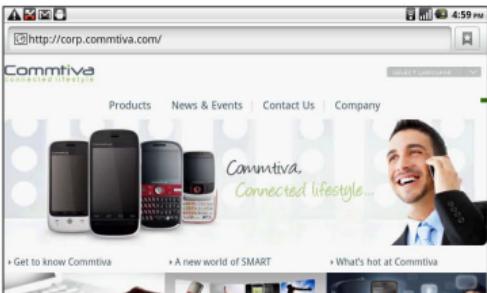

1. On Home screen, tap  > **Email**, then tap an email account.
2. Tap **Menu** > **Refresh**.

Using Browser

To open a web page

1. On Home screen, tap  > **Browser**.
2. Tap the address bar.
3. Type the URL then tap .

Tap **Menu** to access more functions.

Swipe your finger up or down to scroll the page.

Quick search on the web

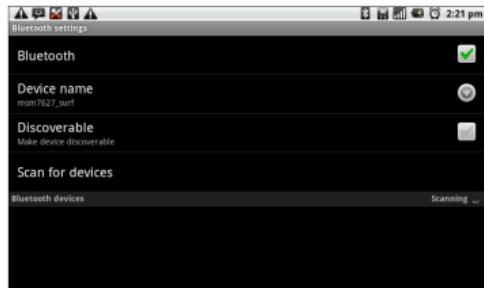

From the Home screen, you can search information on the web with **Google Search**.

1. Tap **Google Search** widget.
2. Type text to search in the Quick Search Box.
3. Tap .

Using Bluetooth

1. On Home screen, tap  > **Settings**.
2. Tap **Wireless & networks**.
3. Tap **Bluetooth** to activate.
4. To search for a new device, tap **Bluetooth settings** > **Scan for devices**.
5. Tap the detected device to connect.
6. Enter the **PIN** to start pairing, then tap **OK**.
 **NOTE:** PIN of the device must be the same PIN on the other pairing bluetooth headsets.
7. The paired bluetooth headset name is displayed.
8. Tap **Done**.

Taking Photos and Videos

This device is equipped with a 3.0 megapixels camera to take photos and videos.

To take a photo

1. On Home screen, tap > **Camera**.
2. Aim the device at the subject, then tap and hold to focus.
3. The focus frame turns green to indicate focus is set, tap to take the shot.

To record video

1. On Home screen, tap > **Camcorder**.
2. Aim the device at the subject.
3. Tap to start recording.
4. Tap again to stop.

NOTE: When in camcorder or camera mode, tap **Menu** > **Settings** to adjust camcorder or camera settings.

Viewing Photos and Videos

To view photos

1. On Home screen, tap  > **Gallery** > **Camera pictures**.
2. Tap an image to view.
3. To view previous/next image, tap left/right of the screen.
4. To play slideshow, tap **Menu** > **Slideshow**.
5. To share or edit an image, tap **Menu** to show options.

To play back videos

1. On Home screen, tap  > **Videos**.
2. Tap the video to play. Tap  to rewind/pause/fast forward the video clip.

Using Aldiko

The Aldiko program allows you to download ebooks from online catalog for viewing on your smartphone.

To browse an ebook

1. On Home screen, tap > **Aldiko**.
2. Select an ebook from your bookshelf and tap to open the book.
3. Swipe your fingers right and left to flip to the previous and the next page.

To download an ebook

1. On Home screen, tap > **Aldiko** > **Download books**.
2. Select from a list of publishers from Aldiko Online Catalog.
3. Tap on the book you want to download and tap **Download**.
4. The downloaded book appears ion your bookshelf.

NOTE: You may need to pay for downloading ebooks.

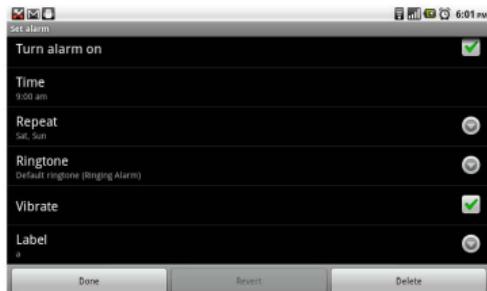

Changing Basic Phone Settings

To change the ringtone

1. On Home screen, tap  > **Settings** > **Sound & display** > **Phone ringtone**.
2. Select preferred ringtones from the list.
3. Tap **OK** to confirm.

To set the alarm

1. On Home screen, tap  > **Clock**.
2. Tap a checkbox to activate an alarm or tap an alarm to enter set alarm submenu.
3. In set alarm submenu, tap an option to change.
4. Tap **Label** to enter alarm description.
5. Tap the checkbox of **Turn on alarm** to activate.

Safety and Legal Information

PLEASE READ BEFORE PROCEEDING

SAFETY INFORMATION

- Use only the batteries and power adapter provided by the manufacturer. The use of unauthorized accessories may void your warranty.
- Do not store your device in temperatures higher than 50°C or 122°F.
- The operating temperature for this device is from 0°C to 50°C.

SAFETY PRECAUTIONS FOR BATTERY USE

- Use only an approved battery.
- Keep the battery dry and away from any liquid since this may cause a short circuit.
- If the battery emits a foul odor, discontinue use.
- If the battery leaks:
 - Do not allow the leaking fluid to come in contact with your skin, eyes or clothing. If already in contact, rinse with clean water immediately and seek medical advice.
 - Keep the battery away from fire since this may cause the battery to explode.
- Do not attempt to open or service the battery yourself.
- Do not dispose battery in fire or water.
- Recycle or dispose used batteries according to the local regulations.

NOTES FOR CHARGING YOUR PHONE'S BATTERY:

- Keep the battery near room temperature when charging it. Never expose batteries to temperatures below 0°C or 32°F, OR above 45°C or 113°F when charging.
- New batteries are not fully charged and may take longer to charge.
- Batteries stored for a long time may take more time to charge.

ROAD AND ENVIRONMENTAL SAFETY

- Turn off the phone in areas with a potentially explosive atmosphere or where flammable objects exist such as gas stations, fuel depots, and chemical plants among others. Sparks from these areas could cause explosion or fire and result in injury or even death.
- Do not use hand-held phones while driving a vehicle. Use hands-free devices as an alternative.

SAFETY IN AIRCRAFT

Do not use the phone on board an aircraft. The phone's network signals may cause interference to the navigation system. As a safety measurement, it is against the law in most countries to use the phone on board an aircraft.

OTHER SAFETY & GENERAL INFORMATION

This section contains important information on the safe and efficient operation of your mobile device. Read this information before using your mobile device.

EXPOSURE TO RADIO FREQUENCY (RF) ENERGY

Your mobile device contains a transmitter and receiver. When it is ON, it receives and transmits RF energy. When you communicate with your mobile device, the system handling your call controls the power level at which your mobile device transmits. Your mobile device is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

OPERATIONAL PRECAUTIONS

For optimal mobile device performance, and to be sure that human exposure to RF energy does not exceed the guidelines set forth in the relevant standards, always follow these instructions and precautions.

PRODUCT OPERATION

When placing or receiving a phone call, hold your mobile device just like you would a landline phone. If you wear the mobile device on your body, always place the mobile device in a body-worn accessory such as a holder, holster, case, or body harness. If you do not use a body-worn accessory, keep the mobile device and its antenna at least 2.5 centimeters (1 inch) from your body when transmitting. Using accessories not supplied or approved by the manufacturer may cause your mobile device to exceed RF energy exposure guidelines.

RF ENERGY INTERFERENCE/COMPATIBILITY

Nearly every electronic device is subject to RF energy interference from external sources if inadequately shielded, designed, or otherwise configured for RF energy compatibility. In some circumstances, your mobile device may cause interference with other devices. Follow Instructions to Avoid Interference Problems. Turn off your mobile device in any location where posted notices instruct you to do so. In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight.

IMPLANTABLE MEDICAL DEVICES

If you have an implantable medical device, such as a pacemaker or defibrillator, consult your physician before using this mobile device.

Persons with implantable medical devices should observe the following precautions:

ALWAYS keep the mobile device more than 20 centimeters (8 inches) from the implantable medical device when the mobile device is turned ON.

- DO NOT carry the mobile device in the breast pocket.
- Use the ear opposite the implantable medical device to minimize the potential for interference.
- Turn OFF the mobile device immediately if you have any reason to suspect that interference is taking place.

Read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your mobile device with your implantable medical device, consult your healthcare provider.

Glass Parts

Some parts of your mobile device may be made of glass. This glass could break if the product is dropped on a hard surface or receives a substantial impact. If glass breaks, do not touch or attempt to remove. Stop using your mobile device until the glass is replaced by a qualified service center.

SEIZURES/BLACKOUTS

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when playing video games. These may occur even if a person has never had a previous seizure or blackout.

If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult with your physician before playing video games or enabling a flashing-lights feature (if available) on your mobile device.

Quick Start Guide

Discontinue use and consult a physician if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. It is always a good idea to hold the screen away from your eyes, leave the lights on in the room, take a 15-minute break every hour, and stop use if you are tired.

CAUTION ABOUT HIGH VOLUME USAGE

Warning: Exposure to loud noise from any source for extended periods of time may affect your hearing. The louder the volume sound level, the less time is required before your hearing could be affected. To protect your hearing:

- Limit the amount of time you use headsets or headphones at high volume.
- Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can't hear people speaking near you.

If you experience hearing discomfort, including the sensation of pressure or fullness in your ears, ringing in your ears, or muffled speech, you should stop listening to the device through your headset or headphones and have your hearing checked.

REPETITIVE MOTION

When you repetitively perform actions such as pressing keys or entering finger-written characters, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. If you continue to have discomfort during or after such use, stop use and see a physician.

SOFTWARE COPYRIGHT NOTICE

This phone model may include copyrighted third-party software stored in semiconductor memories or other media. Laws in the United States and other countries preserve for third-party software providers certain exclusive rights for copyrighted software, such as the exclusive rights to distribute or reproduce the copyrighted software. Accordingly, any copyrighted software contained in this phone model may not be modified, reverse-engineered, distributed, or reproduced in any manner to the extent allowed by law. Furthermore, the purchase of this phone model will not be deemed to grant either directly or by implication, estoppels, or otherwise, any license under the copyrights, patents, or patent applications of any third-party software provider, except for the normal, non-exclusive, royalty-free license to use that arises by operation of law in the sale of a product.

CONTENT COPYRIGHT

The unauthorized copying of copyrighted materials is contrary to the provisions of the Copyright Laws of the United States and other countries. This phone model is intended solely for copying non-copyrighted materials, materials in which you own the copyright, or materials which you are authorized or legally permitted to copy. If you are uncertain about your right to copy any material, please contact your legal advisor.

GPS & AGPS

This phone model can use Global Positioning System (GPS) signals for location-based applications. GPS uses satellites controlled by the U.S. government that are subject to changes implemented in accordance with the Department of Defense policy and the Federal Radio Navigation Plan. These changes may affect the performance of location technology on your mobile device. Your mobile device can also use Assisted Global Positioning System (AGPS), which obtains information from the cellular network to improve GPS performance. AGPS uses your wireless service provider's network and therefore airtime, data charges, and/or additional charges may apply in accordance with your service plan. Contact your cellular service provider for details.

YOUR LOCATION

Location-based information includes information that can be used to determine the approximate location of a mobile device. Mobile phones which are connected to a wireless network transmit location-based information. Devices enabled with GPS or AGPS technology also transmit location-based information. Additionally, if you use applications that require location-based information (e.g. driving directions), such applications transmit location-based information. This location-based information may be shared with third parties, including your wireless service provider, applications providers, and other third parties providing services.

EMERGENCY CALLS

When you make an emergency call, the cellular network may activate the AGPS technology in your mobile device to tell the emergency responders your approximate location. AGPS has limitations and might not work in your area. Therefore:

- Always tell the emergency operator your location to the best of your ability; and
- Remain on the phone for as long as the emergency operator instructs you.

NAVIGATION

Mapping information, directions, and other navigational data, use a combination of governmental and private location information sources. These sources may contain inaccurate or incomplete data. Therefore, you should visually confirm that the navigational instructions are consistent with what you see. All drivers should pay attention to road conditions, closures, traffic, and all other factors that may impact driving. Always obey posted road signs.

TRADEMARK AND INTELLECTUAL PROPERTY INFORMATION

This product has an Android platform based on Linux, which can be expanded by a variety of Java-Script-based application SW. Google, the Google logo, Google Maps, Google Talk, Google Search, Gmail, You Tube, Google , Android, Android market are trademarks of Google Inc. Use of the trademarks is subject to Google Permissions.

Bluetooth and the Bluetooth logo are trademarks owned by Bluetooth SIG, Inc. Wi-Fi, the Wi-Fi CERTIFIED log, and the Wi-Fi logo are registered trademarks of the Wireless Fidelity Alliance. Java, JME and all other Java-based marks are trademarks or registered trademarks of Sun Microsystems, Inc. in the United States and other countries. microSD is a trademark of SD Card Association.

The prediction engine of the input method is TouchPal, provided by COOTEK. Documents To Go, RoadSync Calendar, RoadSync Mail are provided by DataViz, Inc. who is the owner to these trademarks. eBuddy social network application is provided by eBuddy who is the owner to the trademark.

All other company, product and service names mentioned herein are the trademarks, registered trademarks or service marks of their respective owners.

FCC NOTICE

The following statement applies to all products that have received FCC approval. Applicable products bear the FCC logo, and/or an FCC ID in the format FCC-ID: X7H-N700 on the product label.

This mobile device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This mobile device may not cause harmful interference, and (2) this mobile device must accept any interference received, including interference that may cause undesired operation. This mobile device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be colocated or operating in conjunction with any other antenna or transmitter.

RF EXPOSURE INFORMATION (SAR)

DEVICE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile devices employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the device as reported to the FCC when tested for use when worn on the body, as described in this user guide, is 1.39 W/kg. (Body-worn measurements differ among device models, depending upon available accessories and FCC requirements.)

While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this device is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid/ after searching on FCC ID: X7H-N700.
